Be ABC Safe

by Everett Holm, META President

March will mark the one year anniversary of the historic announcement by our past governor that we would be closing schools across the state. The closures have brought into play various strategies to keep our kids learning as well as being safe as much of our instruction was pushed out to the virtual world. Across the state, technologists have worked in their districts assuring our students have the various tools and resources to continue learning all while keeping them safe from the various cyber threats we witness on a continuous basis. Whether it's trying to purchase additional mobile technologies such as Chromebooks and iPads, providing internet service by opening up local school networks, or delivering cellular options, it has definitely been a new era that was not necessarily in our job descriptions.

Take some time if you haven't already done so to applaud the efforts of everyone involved in keeping our students learning - the technology staff making sure things work, administrators giving the best guidance they can, teaching staff across the state being online and the challenges of creating and delivering engaging content to their students and parents who overnight became teachers and mentors as their child's learning environment moved from the classroom to the living room.

Members of META have remained focused on not only providing technology resources but likewise taking measures that all of our students and staff are able to use their technology and remaining safe while doing so. To continue the education of our membership, META is proudly presenting our Spring METAtechED Conference March 22-23, 2021 virtually of course. Our theme this year is the *ABCs of Student Safety* which our keynote speaker will present on. In addition to our keynote, we have several sessions lined up including our friends from the FBI letting us know about the bad actors to the bit more technical best practices of administering your local G Suite for Education workspaces. I would encourage not only our META members to register today but invite all administrators likewise to register and join us so that we can all participate in our district's cyber safety teams. Registration and session details are found in the METAtechEd Conference link and in this bulletin.
