SAM Leaders Professional Learning Program

PROGRAM OUTLINE

Description

This module gives a brief of the SAM Leaders Professional Learning Program. The module below is the short promotion Voice/PPT used to inform SAM members about the program.

Related Document:

Foundation

This module describes the foundation of research and thinking upon which the program is designed. The 28 elements or principles of professional learning, continuous learning and systems thinking theory as well as best practices for use of technology with learning. The 28 elements, we believe, constitute what 21st Century Professional Learning looks like in practice. We recommend you spend some time reviewing these principles of learning. They represent not only what 21st Century professional learning looks like for YOU – but how learning in our schools could look for students. We believe that each participant of SAM LPLP 2017-18 can truly personalize their own professional learning AND get a real sense of how we are going to have to change our systems to meet the needs of our students.
