Mike Agostinelli is an educational leader with over two decades of expertise in K-12 education, currently the Assistant Director and Curriculum Director at the Montana Digital Academy. Holding a Master's in Educational Technology and an Ed.S. in Educational Leadership, he has excelled in various instructional and technology leadership roles, including Instructional Program Director, Technology Director, and district administrator. With a passion for advancing student achievement, Agostinelli is recognized as an award-winning presenter at national conferences, focusing on technology integration, online learning, curriculum design, and leadership while also championing high-quality digital learning opportunities and teacher development.

Caitlin Byers is an educator with diverse experience in online, place-based, experiential, and competency education. In her work at Montana Digital Academy as a Student Support and Content Specialist, Caitlin's skills include crafting engaging online curriculum, leading teachers in innovative practices, and equipping students with essential online learning skills. Her focus is helping Montana students build the critical skills and strong foundation needed to succeed both in and beyond the virtual world.

Dr. Jason Neiffer is the Executive Director of Montana Digital Academy. For over 25 years, Jason has pursued innovative ways to combine technology and pedagogy to make learning engaging and meaningful for students of all ages. His professional interests include distance learning, media literacy, digital productivity, artificial intelligence, social studies, and humanities education. His first work in educational technology was in 1984 when he set up all of the Apple IIe computers at Roosevelt Elementary School as a rambunctious 4th grader. He has been chasing the thrill of Lemonade Stand and Oregon Trail ever since!
