

OVERVIEW

Experience, People, Processes and Technologies since 1992

Structured is an award-winning solution provider delivering secure, cloud-connected digital infrastructure for modern business.

For nearly 30 years, we've helped clients through all phases of digital transformation by securely bridging people, business and technology. Customers trust us to provide valuable insight throughout the process of selecting and implementing secure and scalable IT strategies, platforms, and processes that meet modern expectations and drive measurable improvements throughout the enterprise. The digital age is creating enormous opportunities for organizations to innovate, automate, and grow -- and technology is the springboard. **Embrace the digital age and transform your business with Structured.**

Security

Today's mobile workforce, combined with complications presented by hosting apps and data in a cloud environment, has obliterated any semblance of a defensible border. Now, infosec professionals must protect a borderless, uncontained collection of employees, contractors, partners and customers -- all using multiple devices from anywhere, at any time -- from outside and within the secure boundaries of the corporate network. Take control with Structured.

Cloud

Cloud-based apps and services propel modern enterprise, but no two organizations are exactly alike when it comes to building and executing a successful multicloud strategy. Proper planning requires careful consideration of where workloads should reside. This is key - especially in light of security, compliance, and compatibility complexities. Don't drift aimlessly into the cloud. Let Structured help you plan with purpose.

Digital Infrastructure

Optimized IT infrastructure is critical for any competitive enterprise. Those embracing automation and a software-defined approach minimize human error, reduce wasteful spending, and deliver network resources at the speed of business. When a robust unified communication platform is added to the mix, either on-premises or in the cloud, your people will be equipped to compete in today's global economy. Thrive in the digital age with Structured.

Access the Experts

Structured's Professional Services offer powerful engineering resources for short-term and long-term project needs. At your disposal, Structured's team of award-winning and certified technology professionals are just a phone call or email away. We partner with clients and the world's leading technology manufacturers to design, streamline, integrate and manage processes that promote excellence and efficiency without sacrificing quality.

Structured's Managed Services are a logical and economical extension of your IT team. Equipped with powerful tools, deep expertise and a robust delivery framework, Managed Services holistically supports your organization from the ground floor to the cloud. Enjoy peace of mind knowing you have a highly skilled team of dedicated professionals monitoring, protecting and managing your mission-critical assets and data 24x7x365.

“Structured is more than a technology company. It is a people company. We are a collection of experienced and skilled professionals pulling together with vision and heart. We do the right thing for the communities and enterprises we serve. Technology changes, our devotion to customer service never will.”

--Ron Fowler, CEO and President of Structured

Transformation At Work
