

### **Liz Cunningham-T.E.S.T., Inc. Professional Bio:**

Total Education Solutions in Technology, Inc. (T.E.S.T., Inc.) was founded by Liz Cunningham in 1999 as a Montana based woman owned company. T.E.S.T. consults closely with Montana schools to research and provide only the best innovative technology. We are committed to helping schools and educators evaluate, implement and integrate the best innovative educational technology to empower students to discover new understanding and attain individual success in efficient and safe environments. T.E.S.T.'s solutions are always focused on what is best for students! Over the years her company has evolved to encompass Safety and Security in the Schools as well, making this an important focus. Total Educational Solutions in Technology, Inc. (T.E.S.T.) recognizes there is no single solution to making schools safe. Protecting students and faculty is an immeasurable moral and legal responsibility that school leadership must address. T.E.S.T. has built a premiere team of diverse employees and partners to serve Montana Schools. Liz's team does not just sell a product but provides assistance in evaluating and implementing comprehensive security solutions to school districts across Montana!

### **Rian Schermerhorn Professional Bio:**

**Rian Schermerhorn**, Cloud Specialist for Motorola Solutions, has been in the physical security industry for more than 20 years, most of which has been focused on the video surveillance segment. He has worked with hundreds of K-12 districts during that time and considers the education market the most important. As a father of four, serving schools throughout the NW has been a personal passion for him, as he feels there is very little more important than protecting the most vulnerable of our population...the kids. Rian currently resides in Sisters, a small town in Central Oregon, and in his role as Cloud Specialist, he is solely focused on working with customers and partners with the Avigilon Alta Unified Cloud solution (formerly Ava Security).
